

SCOPECORDER SERIES

• Powerful mobile data acquisition recorders

DI850

E/

- Measure & analyze dynamic behavior of electromechanical systems
- Flexible modular inputs for voltage, current, sensors and CAN/LIN bus
- Trend & Trigger on electrical power calculations (optional)

Bulletin DL850E-00EN

Powerful data acquisition enables the research of dynamic behavior within your application

A ScopeCorder is a powerful portable data acquisition recorder that can capture and Analyze both transient events and trends up to 200 days. Using flexible modular inputs it combines the measurements of electrical and physical (sensor) signals, such as from CAN, LIN, and Serial buses and is also able to trigger on electrical power related calculations in real-time.

Flexible Inputs with Built-in Signal Conditioning

Choose from up to 17 input modules and gain a thorough insight into any application by synchronizing the measurement of multiple parameters.

- Voltage & Currents
- Sensor Outputs
- Temperature, Vibration / Acceleration, Strain, Frequency
- Logic Signals & CAN / LIN

Measure and Analyze a wealth of signals in real-time and speed up development & fault finding

- Application Benefits -

Precise measurement of fast switching signals even in the most harsh environments

Measure different types of electrical and physical signals simultaneously

A trustworthy platform for durability testing

Reduce time spent on fault finding by capturing transient signals even during long term measurements.

Real-time evaluation of dynamic behaviour within Power applications

Synchronization of measurement data from different remote locations.

SCOPECORDER

- Supporting Feature -

Individually isolated and shielded input channels provide high-resolution, sample rates, and accuracy

Choose from 17 different types of input modules

Record measurements up to 200 days to internal hard disk

Powerful trigger functions with unique features such as Dual-Capture & History Memory See page.6

New power MATH trend calculations such as Active Power, Power Factor, Integrated Power and Harmonics See page.8

GPS or IRIG time synchronization

Display and record vast amounts of data with continuous data recording into a hard disk drive in real time

Long duration, continuous saving of waveforms —Hard disk recording (/HD0, /HD1 option)—

Measured data can be streamed directly to a built-in 500 GB hard disk (/HD1 option)^{*1} or through the external HDD interface (/HD0 option)*1. With long periods of evaluation testing, measurements can be performed at 100 kS/s on 16 channels simultaneously for 10 hours*2.

*1 The /HD0 and /HD1 options cannot be specified together. *2 It depends on the external hard sisk connected when using the /HD0 option.

	Sample rate		
	1 MS/s	10 hours	-
	200 kS/s	60 hours	-
	100 kS/s	5 days	10 hours
	20 kS/s	20 days	2.5 days
ec	2 kS/s	200 days*2	20 days

With the /M2 option, the maximum duration depends on the memory length * 2. Real time hard disk recording can be performed for a maximum of 200 days.

Large (2 GPoint) memory offers long duration measurement and two instantaneous zoom locations -2 GPoint memory (/M2 option)-

Comes standard with 250 MPoints of memory, expandable with 1 or 2 GPoint options. Large capacity memory does not simply provide longer durations of measurement.

Continuous data recording for durability test and/or surveillance test

Intuitive, user-friendly acquisition software comes standard. Continuous data recording into a PC Hard Disk Drive(HDD) can be performed by "free-run mode" with no restriction of recording time and file size.

Setup Wizard

SCOPECORDER

-	

Measurements possible with a 2 GPoint long memory

Sample rate	With 1 ch	With 16 ch
100 MS/s	20 sec.	2 sec. (using 8 ch)
10 MS/s	3 min. 20 sec.	10 sec.
1 MS/s	30 min.	1 min. 40 sec.
100 kS/s	5 hours	10 min.
10 kS/s	50 hours	2 hours 30 min.
200 S/s	100 days	5 days
100 S/s	200 days*	10 days

Instantly zooms 1 second (100 ms/div) even when the main screen is displaying 20 days of recording (2 days/div)

> Long memory does not guarantee better efficiency if the memory handling and display engine is slow. Our faster than ever GIGAZoom 2 Engine instantaneously zooms into two locations.

Setup Wizard Makes It Easy

The Wizard automatically recognizes any connected DL850E and its' plug-in modules. Just click the Start button to start measuring right away--no complicated settings to enter. The five screens of the Setup Wizard guide you easily through detailed settings for configuring the system, measuring, saving and displaying. Of course, you can save and recall your settings at any time.

Real Time Waveform Display

You can display a zoomed portion of the waveform simultaneously with the overall waveform during triggered measurement. Even during live recording, you can use the display hold to review past data.

A wide variety of unique acquisition features enables you to capture the target event easily

Measurements

with simultaneous

high- and low-speed

Capture high speed transients during long term recording using "Dual capture"

To visualize long term trends in durability testing and other similar applications, data is typically acquired at low-speed sample rates. In addition, it is also required to capture transient phenomena at high-speeds and high sample rates.

The "Dual Capture" feature satisfies these requirements by recording at two different sampling rates.

You can recall past waveforms using "History Memory", so you'll never miss an abnormal waveform

When you spot an abnormal phenomenon during repetitive high speed measurements, often the anomaly has disappeared from the screen by the time you press Stop.

Always active, the "History" function automatically divides the long memory into segmented (up to 5,000) "history waveforms" that can be redisplayed at any time.

Searching history waveforms

When you want to extract specific abnormal phenomena, you can perform condition-based searches inside the history waveforms. You can create a rectangular zone on screen and extract only waveforms that pass through or do not pass through the zone. You can also extract data based on parameters such as amplitude or RMS.

Key Point

The History function requires no action during measurement. You can recall data at any time after measurement has been completed Once waveforms have been recalled, you can zoom locations of interest or perform parameter measurements

Reduce time spent on fault finding or transient analysis

Simple & Enhanced triggers

power to investigate what causes an certain transient event. This also helps to

Wave Window Trigger

The ideal trigger for AC power line monitoring. Easily capture a voltage sag, interfering impulses, phase shift or drop out.

Time synchronization for accurate measurements

The internal time clock (date and time) can be synchronized and adjusted across multiple units. Applications are likely to include synchronizing the ScopeCorder at a windmill farm, finding faults in power grids, and more.

IRIG interface (/C20 option)

Synchronized measurement across multiple DL850 units is made possible by inputting an IRIG time code signal.

Powerful data processing and Math

Interfaces and Software

Processes noise rejection and executes powerful computations in real time - /G3 option

The DL850E is armed with a dedicated DSP (digital signal processor) for computations that enables between-channel math during waveform capture. These between-channel computations are powerful because they can be set up separately from filter computations. In addition to FIR, IIR, Gauss, and moving average digital filters, you can choose from 37 unique functions such as arithmetic with coefficients. integrals and differentials, and higher-order equations.

Trend waveform monitor for power and harmonic parameters in real time - /G5 option -

Max. 126-type power parameter can be calculated. The calculation results of these parameters can be displayed in DL850E screen as trend waveforms in real time. The raw signal waveforms along with calculated parameters(waveforms) can be displayed as trend waveforms with maximum data updating rate of 100kS/s.

Trend waveforms of each orders of harmonics, bar-graphs and vector displays can be displayed.

Application

Dedicated set-up menu Once the "Analysis" key is pressed on the front panel, the dedicated set-up menu will appear on the screen which enables to setup easily

A wealth of functions gets you right to the waveform you want - User defined computation (/G2 option) -

The DL850E comes standard with arithmetic, time shift, FFT, and other computations that enable you to display waveforms with offsets and skew corrections. And with user defined computations (/G2 option), you can create equations using a combination of differentials and integrals, digital filters, and a wealth of other functions.

DL35UE VEHICLE EDITION

Enhanced capabilities for vehicle design and development suchas CAN& UN Buses monitoring

Data to be acquired using a bus monitor module (720240 or 720241) can be specified not only in digital code (hexadecimal or numeric), but also loaded from a network definition file (CAN DBC or LIN LDF).

Note: There is a certain restriction when using the 720240 and/or 720241 modules together with the /G5 option. Please contact our sales representative.

Support for both AC and DC power (/DC option, DL850EV only)

The DL850EV Vehicle Edition can be driven by a 12 V DC battery, vehicle's cigarette lighter, or ordinary AC power. (We provide accessories for DC driving; see the list of accessories at the end of the catalog.)

 Low power consumption of 60 - 120VA (typ.) Low noise compared to using an external inverter 	
• Can be driven by external DC power such as the vehicle's battery 12 V DC (10 – 18 V)	
• Can also be driven by AC power. 100 V AC (100 – 120 V) 200 V AC (200 – 240 V)

Applications

Motor, Inverter evaluation with noise-proof

- EV/HEV test
- Railways Motor characteristic test
- Home Appliance Inverter test
- Maintenance
- New Energy Wind Power, Solar Power -
- Power transient analysis

ScopeCorder Solutions

- Realtime Power calculations
- Multi-channel and continuous measurement (Power +)
- 6-input (3-voltage and 3-current) waveforms for 2-system simultaneous measurement
- Long memory Isolation, 12-bit resolution, 100MS/s

- Power steering evaluation
 - In-Vehicle test
 - Engine performance test
 - ECU Test
 - CVT test

ScopeCorder Solutions

Durability test/ Surveillance test

- Test for a production line
- Durability test High-speed universal
- data logging

ScopeCorder Solutions

- Dedicated ACQ Software
- Long-term HDD recording
- Max. 128-CH measurements
- GO/NO-GO determination

Measurement Range and Display Range

· Zoom in or out of the vertical axis (expand/reduce).

The measurement range of the ScopeCorder is ±10 divisions (20 divisions of absolute width (span)) around 0 V. The display range of the screen is ± 5 divisions (10 divisions of span). The following functions can be Mea used to move the displayed waveform and display the waveform outside the display range by expanding/reducing the displayed waveform.

· Move the vertical position.

· Set the offset voltage.

Probe power output (/P4 option)	Number of terminals: 4, output voltage ±12V	
General specifications		
Rated power supply voltage	100 to 120VAC/220 to 240VAC (automatic switching)	
Rated power supply frequency	50/60Hz	
Maximum power consumption	200VA	
Withstand voltage	1500V AC between power supply and earth for 1 minute	
Insulation resistance	$10 \text{M}\Omega$ or higher at 500V DC between power supply and earth	
External dimensions	Approx. 355mm (W) × 259 mm (H) × 180 mm (D), excluding handle and other projections	
Weight	Approx.6.5kg(for main unit only, include /B5/M2/HD1/P4 options, exclude chart paper)	
Operating temperature range	5 to 40 °C	
12 V DC power (/DC option, for DL850)EV only)	
Supply method	Automatic DC/AC switching (with priority on AC), isolated	
	between DC power input terminal and main unit	
Rated supply voltage	12 V DC	
Allowable supply voltage	10 to 18 V DC	
Power consumption	Approx. 150 VA maximum	
Voltage input protection circuit	Overcurrent detection: Breaker (15 A)	
	Inverse connection protection: Breaker shutdown	
	Undervoltage detection: Interruption at approx. 9.5 V or lower	
	00 V AO between DO assure terminal and around for 1 min	
	30 V AC between DC power terminal and ground for 1 min	
Insulation resistance	10 ML2 or more at 500 V DC between DC power terminal and ground	
External dimensions including	Approx. 355 mm (W) x 259 mm (H) x 202mm (D), excluding the	
Weight of DC neuror here

Model	Suffix Codes	Description		
DL850E		DL850E main unit, 250MPts(W) memory ¹		
DL850EV		DL850EV main unit, 250MPts(W) memory ¹		
	-D	UL and CSA standard		
Power Cord	-F	VDE standard		
	-R	AS standard		
	-Q	BS standard		
	-H	GB standard		
	-N	NBR standard		
	-HE	English menu and panel		
	-HJ	Japanese menu and panel		
	-HC	Chinese menu and panel		
Languages	-HK	Korean menu and panel		
Languagee	-HG	German menu and panel		
	-HF	French menu and panel		
	-HL	Italian menu and panel		
HS		Spanish menu and panel		
	/B5	Built-in printer (112mm) ³		
	/DC	DC12 V power (10-18 V DC) (can be specified for DL850EV only) ⁵		
	/M1	Memory expansion to 1GPts(W) ²		
	/M2	Memory expansion to 2GPts(W) ^{*2}		
	/HD0	External HDD interface ^{'3}		
Options	/HD1	Internal HDD (500GB) ^{"3}		
	/C1	GP-IB interface ¹⁴		
	/C20	IRIG and GP-IB interface ^{'4}		
	/C30	GPS interface ^{14,17}		
	/G2	User-defined math function		
	/G3	Real time math function ⁶		
	/G5	Power math function (with including Real time math function)"6		
	/P4	Four probe power outputs		

*1: The main unit is not supplied with a plug-in module. *2, *3, *4, *5, and *6: When selecting these, specify one of them.

*7: The /C30 option can be provided only for a nation that is not prohibited by the Radio Law.

Plug-in Module Model Numbers

Model	Description
720210	High-speed 100 MS/s 12-Bit Isolation Module (2 ch)
720220	Voltage Input Module(16 ch)
720221	16-CH Temperature/Voltage Input Module
701953-L1	16-CH Scanner Box (provided with 1 m cable)
701953-L3	16-CH Scanner Box (provided with 3 m cable)
720230	Logic Input Module (16 ch)
720240	CAN Bus Monitor Module (32 ch, available DL850EV only)
720241	CAN & LIN Bus Monitor Module
701250	High-speed 10 MS/s 12-Bit Isolation Module (2 ch)
701251	High-speed 1 MS/s 16-Bit Isolation Module (2 ch)
701255	High-speed 10 MS/s 12-Bit non-Isolation Module (2 ch)
701261	Universal Module (2 ch)
701262	Universal Module (with Anti-Aliasing Filter, 2 ch)
701265	Temperature/high-precision voltage Module (2 ch)
701267	High-voltage 100 kS/s 16-Bit Isolation Module (with RMS, 2 ch)
701270	Strain Module (NDIS, 2 ch)
701271	Strain Module (DSUB, Shunt-CAL, 2 ch)
701275	Acceleration/Voltage Module (with Anti-Aliasing Filter, 2 ch)
701281	Frequency Module (2 ch)
Probes are no	ot included with any modules.

Note 1: These modules can be used with the DL750/DL750P/SL1000 and SL1400 as well with Note 1: These modules can be used with the beneficience of the table of table

Xviewer model numbers and suffix codes			
Model	Suffix Codes	Description	
701992	-SP01	Xviewer Standard Edition (1 license)	
	-GP01	Xviewer Math Edition (1 license)	
Option	/JS01	DL850 Advanced Utility (1 license)	

* : Some volume license packs are available. Please contact our sales representative.

Probes, Cables, and Converters Model No. Product **Description**¹¹ 100:1 Probe (for Isolated BNC Input) 701947 1000 V (DC+ACpeak) CAT II 10:1 Probe (for Isolated BNC Input) 700929 1000 V (DC+ACpeak) CAT II 1:1 Safety BNC Adapter Lead 701901 1000 Vrms-CAT II (in combination with followings) Safety Mini-Clip (Hook type) 701959 1000 Vrms-CAT II, 1 set each of red and black Large Alligator-Clip (Dolphin type) 701954 1000 Vrms-CAT II, 1 set each of red and black Alligator Clip Adaptor Set 758929 1000 Vrms-CAT II. 1 set each of red and black (Rated Voltage 1000 V) Alligator Clip Adaptor Set 758922 300 Vrms-CAT II. 1 set each of red and black (Bated Voltage 300 V)

(interest voltage ever v)		
Fork Terminal Adapter Set	758321	1000 Vrms-CAT II, 1 set each of red and black
Passive Probe ^{*2}	701940	Non-isolated 600 Vpk (701255)(10:1)
1:1 BNC-Alligator Cable	366926	Non-isolated 42 V or less, 1m
1:1 Banana-Alligator Cable	366961	Non-isolated 42 V or less, 1.2m
Current Probe ^{*3}	701933	30 Arms, DC to 50 MHz, supports probe power
Current Probe ^{*3}	701930	150 Arms, DC to 10 MHz, supports probe power
Current Probe ^{*3}	701931	500 Arms, DC to 2 MHz, supports probe power
Probe Power Supply ^{*4}	701934	Large current output, external probe power supply (4 outputs)
Shunt Resistor	438920	250 Ω±0.1%
Shunt Resistor	438921	100 Ω±0.1%
Shunt Resistor	438922	10 Ω±0.1%
Differential Probe	700924	1400 Vpk, 1000 Vrms-CAT II
Differential Probe	700925	500 Vpk, 350 Vrms (For 701255)
Differential Probe	701926	7000Vpk, 5000Vrms
Bridge Head (NDIS, 120 Ω)	701955	With 5 m cable
Bridge Head (NDIS, 350 Ω)	701956	With 5 m cable
Bridge Head (DSUB, Shunt-CAL, 120 Ω)	701957	With 5 m cable
Bridge Head (DSUB, Shunt-CAL, 350 Ω)	701958	With 5 m cable
Safety BNC-banana Adapter	758924	500 Vrms-CAT II
Printer Roll Paper	B9988AE	For DL850E, DL850EV, 10 m× 10
Logic Probe ^{°5}	702911	8-Bit, 1 m, non-Isolated, TTL level/Contact Input
Logic Probe ^{*5}	702912	8-Bit, 3 m, non-Isolated, TTL level/Contact Input
High-speed Logic Probe ^{*5}	700986	8-Bit, non-Isolated, response speed: 1 µs
Isolated Logic Probe ⁷⁶	700987	8-Bit, each channel isolated
	758917	Measurement leads (2 per set) Alligator-Clip is required separately.
Measurement Lead Set	758933	1000 V/19 A/1 m length Alligator-Clip is required separately.
Safety BNC-BNC Cable (1 m)	701902	1000 Vrms-CAT II (BNC-BNC)
Safety BNC-BNC Cable (2 m)	701903	1000 Vrms-CAT II (BNC-BNC)
External I/O Cable	720911	For external I/O connection
Plug-On Clip	701948	For 700929 and 701947
Long Test Clip	701906	For 700924 and 701926
Terminal	A1800JD	For 720220 input terminal, one (1) piece
Soft Carrying Case	701963	For DL850E/DL850EV
Connecting cables	705926	Connecting cable for 701953 (1 m)
	705927	Connecting cable for 701953 (3 m)
DC Power Supply Cable (Alligator clip type)	701971	For DL850EV DC 12 V Power
DC Power Supply Cable (Cigarette lighter plug type)	701970	For DL850EV DC 12 V Power
DC Power Supply Connector	B8023WZ	It comes standard with the /DC option
GPS antenna	A1058ER	It comes standard with the /C30 option

*1 Actual allowable voltage is the lower of the voltages specified for the main unit and cable.

24 2V is safe when using the 701940 with an isolated type BNC input.
*3 The number of current probes that can be powered from the main unit's power supply is limited.
*4 Any number of externally powered probes can be used.
*5 includes one each of the B9879PX and B9879KX connection leads.
*6 Additionally, 758917 and either the 758922 or 758929 are required for measurement.

This is a Class A instrument based on Emission standards EN61326-1 and EN55011, and is designed for an industrial environment. Operation of this equipment in a residential area may cause radio interference, in which case users will be responsible for any interference which they cause.
